- RE-USABLE
- TIME SAVER
- JUST ADD WATER
- READY TO CURL IN AS LITTLE 1½ DAYS
- PLANT FAILURE NO PROBLEM
- 100% RECYCLABLE

Redwater Curling Club

Seemingly endless hours are spent at the curling rink in preparation for the first rock to be played. Painting the lines and rings is labor intensive and not always accurate. After years of this long drawn out process, one might think there must be an easier way. **Now there is!**

With the creation of the printed rink liner (*"Easy Sheet"™*) the messy painting and gruelling hours is a thing of the past. Installing these printed liners at your club will result in **HUGE** savings each and every year. Ice installation, power and gas are just some of the key areas that will be reflected in your funds.

Because of the quick set up, you will never have to worry about plant failure again. In the time it takes to flood the ice in, you can have your curling surface ready for action without having to redo a single thing.

No more washing the paint down the drain after the end of the season. With the environmentally friendly *"Easy Sheet"™*, there is nothing to throw away. Just roll it up and store it for next year!

All of our rink liners meet the precise regulations and standards of the Canadian Curling Association.

Why make things more complicated than necessary? Save valuable time and money with **Hack to Hack Solutions** and let us change your world today.
